Features:
The VM-40 (omni-directional) and VM-41 (cardioid) condenser microphones are both for operation on 48 volt MIPOW™ system. Ruggedly constructed and small physical size, the VM-SERIES feature a unique four-position ring switch to permit selection of either full range frequency response or gentle roll-off from 1 kHz with 12 dB down at 50 Hz. A 10 dB pad is also incorporated for both full range and roll-off positions.

Description:
- Circular single membrane full condenser capsule.
- Single FET pre-amplifier.
- Four-position ring switch built around two reed switches for full range or high-pass response with 10 dB pad.
- Rugged construction.
- Precision machined solid case.
- 3-pin XLR male connector at the base.

Applications:
For all high quality professional uses, and particularly impressive on acoustic instruments, overhead percussion, cymbals, snare and brass. Recommended position of use is from about three inches to several feet from source depending on sound pressure levels and desired degree of natural ambience pick-up. May be used effectively as a podium/lecture microphone for public address.
