

RCA UNI-DIRECTIONAL MICROPHONE

RCA Uni-Directional Microphone of entirely new design. Uses the exclusive RCA principle of two ribbons (one pressure actuated, one velocity actuated) in series, to obtain a nearly perfect cardioid pattern and uniform frequency response. An excellent microphone that assures good pick-ups under high reverberatory conditions. Particularly good for stage use. Picks up all sounds from the stage excluding audience and house noises.

SPECIFICATIONS

Frequency Range	40-10,000 cycles
Output Level	-63 dB (10 bar open circuit)
Output Impedance	50 and 250 ohms
Cable	30 feet (less plug)
Finish	Chromium and black
Fitting	½-inch pipe thread
Net Weight	2 lbs
Dimensions	8" long, 3¾" wide, 2½" deep

MI-4042—Code, SEHSY
