UNIDIRECTIONAL DYNAMIC MICROPHONES

GENERAL

The Model 545 Series UNIDYNE® III Microphones are slender dynamic microphones built to provide wide range reproduction of music and voice, and have an exceptionally uniform and effective unidirectional pickup pattern.

The microphones are particularly suitable for high quality theater-stage sound systems, recording, cathedrals and churches, and other critical public address systems such as those used in political conventions and legislatures, hotels, stadiums, and public auditoriums.

Microphone Features:

- Unusually effective cardioid pickup pattern that eliminates feedback (annoying loudspeaker “squeals”) and prevents echoing (boominess) that sometimes occurs in partially-filled halls. Can also be used closer to loudspeakers than usual, without creating feedback problems.

- Response especially effective for announcing, narration, vocal and instrumental music.

- Cartridge shock mounted for quiet operation.

- A strong detachable cable especially selected for good shielding from “hum” pickup.

- Dependability and ruggedness under all operating conditions.

The Model 545 Series Microphones are dual impedance for connection to microphone inputs rated at 19 to 300 ohms or to high-impedance microphone inputs.

ARCHITECTS’ SPECIFICATIONS

The microphone shall be the Shure Model 545 (545S) or equivalent. The microphone shall be a dynamic (moving coil) type microphone with a frequency response of 50 to 15,000 Hz. The unit shall have a cardioid polar characteristic. The cancellation at the sides shall be approximately 6 dB, and the cancellation at the rear shall be 15 to 20 dB. The microphone shall be a dual-impedance microphone with a rated impedance of 150 ohms for connection to microphone inputs rated at 19 to 300 ohms and “High” for connection to high-impedance microphone inputs.

The microphone output shall be:

- Low Impedance ........................................... -57 dB
  (0 dB = 1 milliwatt per 10 microbars)

- High Impedance ........................................... -55 dB
  (0 dB = 1 volt per microbar)

The microphone (Model 545) shall be provided with a swivel adapter, adjustable through 90° from vertical to horizontal, and suitable for mounting on a stand having a 3/8-27 thread. It shall be provided with a detachable 4.6m (15 ft) three-conductor shielded cable with a four-pin male audio connector (equivalent to the Amphenol MC4M connector) at the microphone end. The overall dimensions of the microphone shall be 122.2 mm (4-13/16 in.) in height, 31.8 mm (1¼ in.) in width and 148 mm (5-13/16 in.) in depth.

IMPEDEANCE SELECTION

Either high- or low-impedance operation of these microphones is selected by the leads chosen for connection at the equipment end of the microphone cable. For high impedance, the RED lead is the “hot” conductor; the shield is connected to the amplifier or chassis ground. For balanced-line low impedance, the BLACK and WHITE leads are the “hot” conductors; the shield is connected to the amplifier or chassis ground. For unbalanced low impedance, the WHITE lead is the “hot” conductor with the BLACK lead and shield connected together to the amplifier or chassis ground. Any leads not being used for a particular connection should be insulated at the equipment end of the cable.

The low-impedance connection is recommended where long cable lengths are required or under conditions of severe hum disturbance. The permissible cable length is practically unlimited, since neither response nor level is appreciably affected. For use with high-impedance amplifiers, the Shure Model A95 Series Line Matching Transformers are available for coupling a low-impedance line to the amplifier input. The Model A95 Series transformers permit coupling a 19-300 ohm microphone line to a high-impedance input.

Important: Shure Microphone Cables are selected after exhaustive tests to insure superior performance in microphones because of low capacities, superior shielding properties and unusually long life under severe use.

Cables with plastic insulation should not be subjected to excessive soldering-iron heat. Carefully clean and tin the conductors and the connections to which the conductors are to be soldered. The soldering operation can then be done with a minimum of heat, thereby avoiding any possibility of damage to the cable.
SPECIFICATIONS

Type
Dynamic

Frequency Response
50 to 15,000 Hz (see Figure 1)

Polar Pattern
Cardioid (unidirectional) pattern—Effective rejection of sound at the rear of the microphone is uniform at all frequencies, while front pickup characteristics are uniform about the axis (see Figure 2)

Impedance
DUAL: Low: Microphone rating impedance is 150 ohms (270 ohms actual) for connection to microphone inputs rated at 19 to 300 ohms.
High: Microphone impedance is "High" for connection to high-impedance microphone inputs. Selection of impedance made by choice of cable leads connected at equipment end of cable (see section on Impedance Selection).

Output Level (at 1000 Hz)
Low Impedance
Open Circuit Voltage .............. -78 dB* (.125 mV)
Power Level .................... -57 dB**

High Impedance
Open Circuit Voltage .............. -55 dB* (1.76 mV)
Power Level .................... -50 dB = 1 volt per microbar

Switch
Model 545 - None
Model 545S - Built in On-Off switch to control microphone circuit. The switch is an integral part of the connector assembly and is a slide-to-talk locking type switch

Cable
4.6 meter (15 ft) three-conductor shielded with Amphenol MC4M connector on the microphone end

Case
Chrome-plated die casting with black ARMO-DUR® grille and stainless steel screen

Dimensions
See Figure 4

Net Weight
Model 545 - 255 grams (9 oz.)
Model 545S - 425 grams (15 oz.)

FURNISHED ACCESSORY
545
545S
Swivel Adapter ..................... A25B

OPTIONAL ACCESSORIES
Line Matching Transformer .......... A95 Series
Vibration-Isolation Stand .......... S39A
Desk Stand ........................ S39B, S40A
Quick Disconnect Adapter .......... A45
Windscreen ........................ A2WS
Carrying Case ..................... AC54

REPLACEMENT PARTS
Dynamic Cartridge ................. R45
Cable and Plug Assembly .......... C56
Switch ............................. RK32S
Case Assembly ................... RK42C
Connector Assembly ............... RK33CA
Cable Connector .................. RK117P
Plug Element ..................... RK31P

GUARANTEE
This Shure product is guaranteed in normal use to be free from electrical and mechanical defects for a period of one year from date of purchase. Please retain proof of purchase date. This guarantee includes all parts and labor. This guarantee is in lieu of any and all other guarantees or warranties, express or implied, and there shall be no recovery for any consequential or incidental damages.

SHIPPING INSTRUCTIONS
Carefully repack the unit and return it prepaid to:
Shure Brothers Incorporated
Attention: Service Department
1501 West Shure Drive
Arlington Heights, Illinois 60004

If outside the United States, return the unit to your dealer or Authorized Shure Service Center for repair. The unit will be returned to you prepaid.
